Located one-half mile east of Cornelius Pass Road on Skyline

TO THE TRADE ONLY

MOTZ & SON NURSERY is pleased to announce that we hold a Certificate of Compliance from the Oregon Department of Agriculture stating that our nursery has been inspected and tested for Phytophthora ramorum and has been found free of the pathogens.

PRICES HEREIN ARE FOR THE TRADE ONLY and cancel all previous prices offered by us. Prices are based on present market conditions and are subject to change without notice. All prices FOB Portland, Oregon.

VOLUME DISCOUNTS: We offer a volume rate depending on amount of material purchased.

TERMS: Net 30 days from date of invoice to those of established credit or whose responsibility is known to us. A late payment charge of 1.5% per month (which is a true annual rate of 18%) will be made after 30 days on unpaid balances. Any allowances are applicable only when terms of sale are met.

CLAIMS: We guarantee all nursery stock to be in good condition when shipped. Any unsatisfactory stock must be reported immediately and held for advice from us as to disposition. We do not guarantee plants to live after accepted in good condition and will at no time be responsible for more than the purchase price. All claims must be made within five (5) days of receipt of stock.

DISPUTES: In the event a dispute arises as to the enforcement of the terms of this agreement, Motz and Son shall be entitled to all costs including attorney fees whether or not legal action is initiated. Oregon law shall govern all terms of our agreement and should it become necessary to file suit with regard to this agreement, such suit must be brought in the County of Multnomah, State of Oregon.

GUARANTEE: We give no warranty, express or implied, as to life, description, quality, productiveness or any other matter of any nursery stock or plants that we sell. It is mutually agreed that our total liability for any error, should any prove untrue to name as labeled, shall be limited, upon satisfactory proof, to our replacing free or refunding the purchase price thereof. We accept all orders subject to crop conditions, errors in counts, and with the understanding that the same shall be void should injury befall the stock because of hail, fire, frost or other causes beyond our control. We reserve the right to ship one grade size substitute. This guarantee is not transferable and is void if payment of the contract price for the nursery stock shipped is not made in full when due.

CANCELLATIONS: All cancellations or substitutions must be received in writing no later than January 1st. All cancellations after January 1st are subject to 10% restocking charge.

SHIPPING: We reserve the right to refuse acceptance of an order if it is too small to meet shipping requirements. If the order is below 250 units, we will not be able to ship your order. You may pick up your order or arrange your own shipping for these items. No charge for packing car or truck loads. We pack all of our stock with the greatest of care and our responsibility ceases when the stock is delivered to the carrier. We are not liable for delays in transit. Invoicing of freight charges is separate from plant material invoicing. Federal ICC regulations dictate payment of freight charges within seven (7) days of invoicing. Our truck broker provides a prepaid freight service on the assumption that ICC regulations will be observed.

DWARF AND SEMI-DWARF FRUIT TREES

APPLE, DWARF AND SEMI-DWARF

* **Akane:** Mid-harvest season. Tree has a large crown like the Jonathan. Fruit is small and flat. Skin color is bright red. Apple is firm, crisp and has a slightly acid taste. Excellent dessert apple. Bears early in age. Not a good keeper.

* **Beverly Hills:** Early-harvest season. Tree is medium size and vigorous. Fruit is small to medium. Skin is pale yellow splashed with red. Flesh is tender, juicy and somewhat tart. Good for cooking.

* **Braeburn:** Late-harvest season. Excellent flavor, mildly sweet and aromatic with firm; crisp and juicy texture. Very late maturing with excellent storage life.

* **Chehalis:** Early-harvest season. Tree is upright and spreading. Fruit is large. Skin color is greenish yellow with pink blush. Apple is crisp and juicy. It is good for desserts and cooking. Very resistant to scab.

* **Cortland:** Late-harvest season. Tree is strong, spreading and drooping. Fruit is large and somewhat flat. Skin is red. Flesh is crisp, tender and juicy. Stores well.

Criterion: Mid-harvest season. Skin is yellow with red blush. Flavor is sweet. Use for fresh eating or cider.

* **Empire:** Mid-harvest season. Tree is large and upright. Fruit is medium in size. Skin color is dark red with stripes. Apple is crisp and juicy, somewhat sweet, much like the McIntosh. Stores well and is very good for fresh eating. Requires a pollinizer.

Fireside: Late-harvest season. Skin is solid scarlet red. Crisp, sweet and juicy. Holds form well when baked.

Freedom: Late-harvest season. Apple is orange-red with a yellow-green striping with some patches of netted russet. Flesh is fine, juicy with a sub acid flavor. High disease resistance.

* **Fuji:** Late-harvest season. Tree is vigorous and very productive. The skin is straw colored with a red blush. Flavor is a balance between sweet and tart. Long shelf life.

APPLE, DWARF AND SEMI-DWARF — Continued

* **Gala:** Mid-harvest season. Tree is large. Skin is bright scarlet striped over with yellow. Flavor is semi sweet. Apple is excellent quality. Keeps very well.

* **Granny Smith:** Late-harvest season. Tree is upright and spreading. Fruit is large. Skin color is bright green with white dots. Apple is tart and juicy. Good for fresh eating and for sauces. Good keeper.

* **Gravenstein:** Early-harvest season. Tree is upright and spreading. Fruit is medium to large. Skin color is light green with red stripes. Apple has fine texture and is crisp and juicy. It is good for cooking and fresh eating. Requires pollinizer. Pollen sterile.

* **Haralson:** Mid-to-late-harvest season. Fruit is medium size, red and juicy. The tree bears a good crop at an early age and has a firm flesh with a good flavor. Fruit keeps well.

Honeycrisp: (Plant Patent #7179) Mid-harvest season. Fruit is large size. Skin color fluorescent red. Apple has a sweet-tart flavor. Red Delicious and Snowdrift Crab are good pollinizers. Add \$1.25 to the price for each tree purchased in Canada.

Honeygold: Mid-harvest season. Tree is a cross of Yellow Delicious and Haralson. Fruit is medium size. Skin yellow with russet dots. Apple is crisp, juicy and has a very good flavor.

* **Jonagold:** Late-harvest season. Tree is sturdy. Fruit large. Skin color yellow/green with red stripes. Apple has coarse texture and is crisp and juicy. Good for all cooking. Stores well. Requires pollinizer. Pollen sterile.

* **Jonathan:** Mid-harvest season. Tree is small. Fruit is small to medium. Skin color is red. Apple is firm and crisp with a tart taste.

* **King:** Late-harvest season. Tree is fast growing. Fruit is very large. Skin color red. Apple has coarse texture, is firm and sweet. Good for baking and stores well.

* **Liberty:** Late-harvest season. Skin color is red. Apple is crisp and juicy, somewhat tart. Good for fresh eating. Scab free. Requires a pollinizer.

* **Lodi:** Early-harvest season. Tree is large and hardy. Fruit is large. Skin color greenish yellow, also very thick. Apple is soft and tart. Good for sauce and pies.

APPLE, DWARF AND SEMI-DWARF — Continued

* **Macoun:** Late-harvest season. Tree is upright with low branches. Fruit is small. Skin color dark red. Apple has a rich flavor and is very aromatic. Very good for desserts. Good storage life.

* **Melrose:** Late-harvest season. Tree grows to medium height and is upright. Fruit is medium to large in size. Skin color yellow with bright red blush, looks much like Jonathan. Apple is crisp and juicy. Good for cooking. Good keeper.

* **Mutsu/Crispin:** Late-harvest season. Tree is large. Fruit is very large. Skin color is green, turning to yellow as it matures with an orange blush. Apple is coarse in texture, firm and juicy. Good for cooking and baking. Requires pollinizer. Pollen sterile.

Norland: Early-harvest season. Medium size, good quality green and red striped. Good cooking and eating apple.

Northern Spy: Late-harvest season. Apple is large, yellow and is almost totally covered with bright red oversplash with a darker red stripe. Excellent flavor very crisp and juicy.

Pink Lady® Brand Cripps Pink Variety: Late-harvest season. Fruit is oblong with pink blush over yellow overtone. Flesh is creamy white. Flavor is sweet-tart. Long storage life. Add \$1.00 to the price for each tree.

Pink Pearl: Early-harvest season. Fruit is yellow-green skin with a bright pink flesh. Taste is tart. Apple is crisp and juicy. Great for making pink applesauce.

Prairie Spy: Late-harvest season. Fruit is large, firm and is excellent for baking and a good keeper. Tree is vigorous and productive.

Prima: Early-harvest season. Tree is moderately vigorous. Fruit is medium to large. Yellow skin often blushed with dark red. Flesh is white and juicy. Good for cooking. Requires other early blooming variety for pollinizer. Disease resistant.

* **Red Delicious:** Mid-harvest season. Tree is large and upright. Fruit is medium size. Skin color is red with stripes. Apple is juicy, sweet tasting and aromatic. Requires pollinizer.

Red Fuji: Late-harvest season. Fruit is red. Flesh is crisp and juicy. Taste is sweet and great for fresh eating and baking.

APPLE, DWARF AND SEMI-DWARF — Continued

Red Gravenstein: Early-harvest season. Tree is upright and spreading. Fruit is large. Skin color is light green with dark red stripes. Apple has a fine texture and is crisp and juicy. Good for fresh eating or cooking. Requires pollinizer. Pollen sterile.

* **Red McIntosh:** Mid-harvest season. Tree has vigorous growth habits and is very good in cool areas. Fruit is medium. Skin color is red. Apple is sweet and tender. Good for dessert. Requires pollinizer.

* **Red Spy:** Late-harvest season. Tree is upright and hardy. Skin color has bright red stripes. Apple is tender and juicy. Good in cooking. Old apple variety.

* **Rome Beauty:** Mid-to-late harvest red apple. Good keeper. Use for cooking. Low chill requirements.

* **Spartan:** Late-harvest season. Tree is strong and a very heavy producer. Fruit is medium. Skin color is red. Apple is crisp, firm and juicy. Very aromatic. Good for fresh eating and desserts. Good keeper.

Spitzenburg: Late-harvest season. Skin color is red dotted with yellow. Apple is crisp and fine-grained.

* **Summerred:** Early-harvest season. Tree has strong upright growth. Fruit is medium to large. Skin color is red speckled with dots. Apple is firm and rich in flavor. Good for cooking. Holds well on tree. Good keeper.

* **Sweet Sixteen:** Mid-harvest season. Cold-hardy apple with a unique yellow-red flesh and sugar sweet flavor. Perfect for fresh eating. Resistant to scab and blight. Zone 4-7. Requires pollinizer.

* **Wealthy:** Mid-harvest season. Tree is open and spreading. Fruit is large. Skin is deep red. Flesh is white, firm with fine grain and juicy. Good cooking variety. Cold hardy.

* **Winesap:** Late-harvest season. Fruit is medium in size. Skin color is yellow with red stripes. Apple is crisp and juicy with a coarse texture. Good for canning. Keeps well. Requires pollinizer.

* **Winter Banana:** Late-harvest season. Fruit is medium large in size. Skin color is pale yellow with a pink blush. Apple has a waxy texture and is tangy and juicy. Requires pollinizer.

APPLE, DWARF AND SEMI-DWARF – Continued

* **Yellow Delicious:** Late-harvest season. Tree is upright and medium to large, with a round head. Fruit is medium to large. Skin color yellow with pink blush. Apple is crisp, firm and aromatic. Good for fresh eating and cooking. Bears young.

Yellow Newtown: Late-harvest season. Tree is large. Fruit also large. Skin color yellow. Apple is crisp and tart. All purpose apple, very good for cider. Good keeper.

* **Yellow Transparent:** Early-harvest season. Tree is tall. Fruit is medium in size. Skin color clear yellow. Apple is very tender and tart. Good for cooking. Short life when ripe.

OLD APPLE, SEMI-DWARF AND DWARF

Arkansas Black: Late-harvest season. Apple purplish red. Flesh is hard and crisp. Good for applesauce.

* **Cox Orange Pippin:** Mid-to-late-harvest season. Apple is red and yellow. Flesh is firm and juicy. Good for dessert and processing.

Golden Russet: Mid-to-late-harvest season. Round, golden russet with a bronze cheek. Flesh crisp and tender. Sweet and juicy. Good eaten fresh or for desserts. Excellent keeper.

Pound Sweet: Late-harvest season. Fruit is large in size. Skin is light to dark green with whitish cast. Peculiar, sweet flavor. Good for baking and canning.

Roxbury Russet: Late-harvest season. Fruit is mid-size with roundish shape. Skin is very russeted. Good cooking apple.

Snow Famuse: Mid-to-late-harvest season. Bright red skin, pure white flesh, sometimes streaked red. Crisp, aromatic, juicy. One of the oldest varieties. Excellent for fresh eating or desserts, not for cooking. Grows best at high elevations.

Summer Rambo: Summer apple. Skin is greenish with a red blush. Good cooking apple.

* **Wolf River:** Early-harvest season. Tree is a strong, hardy and spreading grower. Skin color is red. Apple is very large.

CRAB APPLE DWARF AND SEMI-DWARF

* **Whitney:** Late-harvest season. Fruit is large. Skin color is red with stripes. Crab apple is tender and juicy. Great for pickles, fresh eating and sauces.

FRUITING QUINCE, DWARF

Pineapple: An attractive ornamental with a large, white to pink spring flower. Its leaves are dark green with whitish undersides. Skin is golden yellow and smooth. Fruit has a slightly pineapple taste.

Rich's: Extremely large fruit with lemon-yellow skin. Fruit is fragrant and covered with downy hairs. Tree does well in most regions.

PEAR, DWARF

* **Anjou:** Mid-harvest season. Tree is upright and slow bearing. Fruit is large. Skin color is light green. Pear has fine texture and is mild and juicy. Very good for fresh eating.

* **Bartlett:** Early-harvest season. Vigorous tree. Fruit medium to large. Skin color green and ripens to a yellow. Pear is sweet and tender. Good for fresh eating and canning. Ripens without cold storage.

* **Bosc:** Mid-harvest season. Tree is large with upright growth. Fruit is large and narrow shaped with a long neck. Skin color is dark yellow with russet. Pear is juicy, sweet and tender. Good for canning, and fresh eating.

* **Clapps Favorite:** Mid-harvest season. Pear is medium to large. Color is yellow. Pear is sweet, aromatic and very juicy. Great for fresh eating.

* **Comice:** Late-harvest season. Tree is large and slow to bear fruit. Fruit is large. Skin color is yellow with russet dots. Pear is sweet, tender and aromatic. Best winter pear. Requires cold storage to ripen.

Conference: Mid-to-late-harvest season. Fruit has a distinctive long, tapering shape. Crops are very heavy. Does well in areas that are wet and cooler than other pears. Great for fresh eating. Self-fertile.

* **Flemish Beauty:** Early-to-mid-harvest season. Tree is hardy. Fruit is medium to large, rounded in shape. Skin color is yellow with red blush. Pear is sweet.

APRICOT, DWARF

Blenheim/Royal: Early-to-mid-harvest season. Tree is very productive. Fruit is large. Skin color is light orange with blush. Apricot is sweet and firm. Good for all uses.

Chinese Mormon: Mid-to-late-harvest season. Tree is medium in size and is spreading. Fruit is small. Skin color is orange with a red blush. Apricot is smooth in texture and is very sweet and juicy. This apricot does well in late frost areas. Tree bears young.

Plum Cot: Mid-harvest season. A cross between a plum and an apricot. Tree resembles plum. Fruit is the size of a medium apricot with pinkish orange skin. Dark red flesh.

Puget Gold: Late-harvest season. Tree bears prolifically. Fruit is large and good flavor. Freestone. Partially self-fertile.

* **Tilton:** Mid-harvest season. Tree bears heavy. Fruit is very large. Skin color is orange. Apricot has a good flavor when eaten fresh.

Wenatchee-Moorpark: Mid-harvest season. Tree bears annually. Fruit is large and oval, somewhat flattened. Skin color is orange and yellow. Apricot has good flavor. Good in the Northwest.

PLUM/PRUNE, DWARF

* **Beauty:** Early-harvest season. Fruit is medium in size and heart-shaped. Skin color is bright red. Plum is sweet and juicy with a very good taste. Good for fresh eating or cooking. Requires a pollinizer.

Burbank: Mid-harvest season. Tree is hardy and low growing with a flat top. Fruit is large. Skin color is red with some yellow blush. Plum is firm and juicy with an excellent flavor. Good for canning or fresh eating. Grows well in cold areas.

* **Damson:** Late-harvest season. Tree is small in size. Fruit is small. Skin color is dark purple. Plum is juicy and tart. Excellent for jams and jellies.

Early Italian: Mid-harvest season. Tree is vigorous and very hardy. Fruit is dark purple. Flesh is yellow greenish that turns dark wine color when cooked. Flavor is rich and very sweet when fully ripe. Super for fresh eating, drying and canning. Free stone.

PLUM/PRUNE, DWARF – Continued

Elephant Heart: Late-harvest season. Fruit is large and heart shaped. Skin is dark, reddish purple. Flesh is sweet and juicy, and is a freestone. Pollinizer required.

* **French Petite:** Late-harvest season. Small fruit. Red to purple/black. Very sweet with mild flavor. Tree is large and lives a long time. Self pollination.

Green Gage: Mid-harvest season. Tree is medium in size. Fruit is medium and oval. Skin color is greenish yellow. Plum is mildly sweet juicy. All purpose plum.

Hollywood: Mid-harvest season. Tree is compact. Height around 10'-12'. Fruits abundantly. Fruit is purplish red flesh with firm and juicy texture. Blossoms are full and cover the branches. Leaves on tree are very pretty purple with a copper color.

* **Italian:** Late-harvest season. Tree is hardy and gives a heavy crop. Fruit is large and oval. Skin color is purplish black. Prune tastes sweet with some tartness. Good for fresh eating.

Methley: Early-harvest season. Tree is upright with hardy flowerbuds. Fruit is medium size with reddish purple skin. Flesh is red and has an excellent flavor. Heavy bearer.

Moyer: Popular European plum. Large fruit size. Fresh eating or drying. Orange flesh.

Mt. Royal: Mid-harvest season. Fruit is blue with yellow clingstone flesh. Excellent flavor. Hardy.

Peach Plum: Mid-harvest season. Fruit is large and round. Skin color is brownish red. Yellow flesh. Good for fresh eating and canning. Pollinizer required.

* **Santa Rosa:** Early-harvest season. Tree is large and hardy. Fruit also large with a cone shape. Skin color is a deep purplish red. Plum has a sweet tart taste and is firm. Excellent for fresh eating. Slow ripening. Pollinizer required.

Satsuma: Mid-harvest season. Tree grows upright. Fruit is medium in size. Skin color is solid deep red. Plum is a semi-freestone with a small pit; sweet taste. Outstanding for fresh eating or canning. Pollinizer required.

Prices for the above items on Page 14

PLUM/PRUNE, DWARF – Continued

Seneca: Late-harvest season. Plum is great for fresh eating with a strong sweet plum flavor. Fruit size very large with a red color. Freestone.

Shiro: Early-harvest season. Tree is low growing and hardy. Fruit is round and medium in size. Skin color is golden yellow. Plum is sweet, juicy and flavorful. Best of the yellow plums. Used for canning and dessert. Tree is very productive. Pollinizer required.

* **Stanley:** Late-harvest season. Tree is large, spreading and bears young. Fruit is large. Skin color is dark blue. Prune is tender and sweet. Good for cooking and fresh eating.

Superior: Late-harvest season. Fruit is large. Skin is dark red with russet dots. Flesh is clingstone and yellow. Early cropper. Good dessert quality. Good for cold regions. Pollinizer required.

Toka: Early-harvest season. Fruit is medium size with rich flavor. Fruit is apricot in color. A very good pollinizer.

PRICES FOR DWARF APRICOTS, PLUMS & PRUNES

SWEET CHERRY, SEMI-DWARF

* **Bing:** Mid-harvest season. Tree produces heavy crop and has spreading growth. Fruit is top quality and large. Skin color is dark burgundy red. Cherry is meaty, sweet and juicy. Excellent for canning. Requires pollinizer.

* **Black Tartarian:** Early-harvest season. Tree grows quickly and is very productive. Fruit is medium size. Skin color is bright purplish black. Cherry is firm and sweet. One of the earliest cherries. Pollinizer could be any sweet cherry.

* **Corum:** Mid-harvest season. Tree is vigorous. Fruit is yellow with a blush and thick, sweet, firm flesh. It is moderately resistant to cracking and is a good canning cherry. Use Royal Ann, Sam or Van as pollinator.

* **Lambert:** Early-harvest season. Tree blooms late with vigorous growth. Fruit is large. Skin color is black. Cherry is firm and sweet. Outstanding for fresh eating. Pollinizers could be Sam or Van.

Prices for the above items on Page 15

SWEET CHERRY, SEMI-DWARF – Continued

Lapins: Early-harvest season. Fruit is large, dark and firm. Excellent flavor and texture. Semi-fertile sweet cherry.

* **Rainier:** Early-harvest season. Tree is upright and productive. Fruit is shaped like a Bing. Skin is yellow with red blush. Cherry is firm and sweet. Pollinizer suggested Bing, Sam and Van.

* **Royal Ann/Napoleon:** Mid-harvest season. Tree is large and grows upright. Fruit is very large. Skin color is light yellow with a pinkish blush. Cherry has a sweet flavor. This is an all-purpose cherry. Pollinizer suggested: Van.

* **Stella:** Mid-harvest season. Skin and flesh is black. Cherry is sweet and juicy. Semi-fertile sweet cherry.

Sweetheart™: Late-harvest season. Tree is upright and a vigorous grower. Fruit is a large and bright red. Tree is self-fertile.

* **Van:** Mid-harvest season. Tree is hardy and bears early. Fruit is medium in size. Skin color is shiny dark. Cherry much like the Bing but more tart. Tree bears heavy and is resistant to cracking. Pollinizers suggested are Bing, Lambert and Royal Ann.

SOUR CHERRY, SEMI DWARF

* **Meteor:** Mid-to-late-harvest season. Tree is genetic dwarf that reaches only about 10' tall. Fruit is a large, bright red pie cherry with clear yellow flesh. Very hardy.

* **Montmorency:** Mid-harvest season. Tree is hardy and produces heavily with medium to large spread. Fruit is large. Skin color is bright red. Cherry's flavor is tart. The best pie cherry. Used commercially.

North Star: Early-harvest season. Tree is slow growing and hardy. Fruit is medium in size. Skin color is bright red. Cherry is tart. Great for pies. Resistant to cracking and brown rot.

**STANDARD & SEMI-DWARF
FRUIT TREES**

See DWARF for description

APRICOT

Blenheim	* Tilton	Puget Gold
Chinese Mormon	Plumcot	Wenatchee-Moorpark

Gold Cot: Early-harvest season. Fruit is medium to large freestone. Skin color is golden yellow. Very early bloomer.

NECTARINE

Fantasia: Mid-harvest season. Tree is vigorous with a nice looking flower. Fruit is large and oval in shape. Skin color is yellow with an overlay of red. Nectarine is a freestone and is firm with a smooth texture; taste is tart.

Flavortop: Mid-to-late-harvest season. Skin is bright yellow with red blush. Flesh is firm, juicy and smooth. Excellent flavor for fresh eating. Freestone.

Prices for the above items on page 20

NECTARINE – Continued

Goldmine: Late-harvest season. Tree is a very good producer. Fruit is large. Skin color is white with red blush. Nectarine is freestone. Good for fresh eating.

* **Hardired:** Mid-harvest season. Fruit is medium size with red blush on yellow skin. Resistant to bacterial leaf spot. Nectarine is freestone. Good for fresh eating. Hardy.

Red Gold: Late harvest season. Fruit is freestone. Skin is yellow with a rich, deep red blush. Flesh is yellow and firm. Good for storing. Resistant to cracking.

Sunglo: Mid-to-late-harvest season. Fruit is large with a smooth skin and freestone. Skin is red. Good for canning and freezing.

PEAR

* Anjou	* Flemish Beauty	* Red Bartlett
* Bartlett	* Kieffer	* Summercrisp
* Bosc	* Luscious	
* Comice	Parker	

PEACH

Canadian Harmony: Mid-harvest season. Peach is attractive with a lot of red blush. Fruit is round, firm and has good texture. Tree is large and upright similar to Red Haven. Freestone.

Cresthaven: Late-harvest season. Tree is self-fertile and above average in hardiness. Fruit is medium to large and round. Skin is golden, overlaid with red. Flesh is firm. Yellow and very juicy.

Early Elberta: Mid-harvest season. Peach is medium to large. Skin color is yellow with some red blush. Peach is a freestone; better flavor than Elberta. Good for canning or freezing.

* **Elberta:** Mid-harvest season. Tree is spreading with pink flowers. Fruit is large. Skin color is golden with red blush. Peach is freestone. Resistant to brown rot. Old variety.

* **Frost®:** Early-to-mid-harvest season. New and resistant to leaf curl. Good in cold regions. Much like the Red Haven. Tree is vigorous and very productive.

Prices for the above items on page 20

PEACH – Continued

Golden Jubilee: Mid-harvest season. Tree has small flowers. Fruit drops early from tree. Fruit is medium in size and oblong. Skin color is bright red. Peach is a freestone with a soft texture. Used for canning and freezing.

Hale Haven: Mid-harvest season. Tree grows very quickly and is a very heavy producer. Fruit is medium to large. Skin color is greenish yellow with red blush, skin is very sweet. Peach is a freestone and is juicy and flavorful. Very hardy tree.

Harken: Early-harvest season. Flavor is sweet. Fruit is large and freestone. Great for fresh eating or canning.

Redhaven: Early-harvest season with a long ripening season. Tree is medium in size and spreading. Fruit is medium in size. Skin color is red, lightly blushed with yellow. Peach is semi-freestone that is sweet and juicy. One of the best for canning.

* **Reliance:** Early-harvest season. Tree is very hardy with showy blooms. Fruit is medium in size. Skin color is yellow with a dark red blush. Peach is a freestone with good flavor. Excellent peach for cold areas.

Suncrest: Mid-harvest season. Firm, large freestone. Red blush over yellow skin. Hardy in cold sections of the North.

* **Veteran:** Mid-harvest season. Tree is highly productive. Fruit is medium in size. Skin color is golden with a slight red blush. Peach is a freestone that is firm, juicy and fairly coarse in grain. Grows well in the Northwest.

Vivid: Mid-harvest season. Bright red, high quality fruit. Productive, vigorous tree. Yield is large. Freestone.

PLUM

- | | | |
|------------|--------------|--------------------|
| * Beauty | Methley | Shiro |
| Burbank | Mt. Royal | Superior |
| * Damson | Peach Plum | Toka |
| Green Gage | * Santa Rosa | Weeping Santa Rosa |
| Hollywood | Satsuma | |

Weeping Santa Rosa: Mid-harvest season. Tree has a weeping form and is very productive and vigorous. Fruit resembles Santa Rosa. Blooms approximately one week after Santa Rosa.

Prices for the above items on Page 20

PLUM – Continued

Yellow Egg: Late-harvest season. Plum is large and golden yellow in color. Flesh is yellow, very juicy, and mild taste. Freestone. Hardy and productive. Self-fertile.

PRUNE

- | | | |
|-----------------|-----------|-----------|
| * French Petite | * Italian | * Stanley |
|-----------------|-----------|-----------|

* **Brooks:** Late-harvest season. Tree breaks early and is a heavy producer. Fruit is large and oval in shape. Skin color is purplish black. Prune is sweet with some acid. Oregon prune, good for drying and canning.

**PRICES FOR STANDARD & SEMI-DWARF
APRICOT, NECTARINE, PEAR, PEACH, PLUM & PRUNE**

1" Br.	14.20
7/8" – 1" Br.	13.50

9/16" – 11/16" Br.	12.05

CHERRY

- | | | |
|-------------------|----------------------|------------|
| * Bing | * Meteor | * Sam |
| * Black Tartarian | * Montmorency | * Stella |
| * Corum | North Star | Sweetheart |
| * Lambert | * Rainier | * Van |
| Lapins | * Royal Ann/Napoleon | |

* **Black Republican:** Abundant crop of dark, sweet red fruit with distinctive flavor. Very hardy, requires pollinizer. Zone 5. A rare find and the parent of Bing.

Early Richmond: Early-harvest season. Tree is medium size. Fruit has bright red skin. Tart flavor. Especially hardy.

Kristin: Dark cherry. Crack resistant. Heavy producer.

Prices for the above items on page 21

CHERRY – Continued

* **Sam:** Mid-harvest season. Tree is hardy and bears early. Fruit is medium in size. Skin color is shiny and dark. Cherry is much like the Bing but more tart. Tree bears heavy and is resistant to cracking. Pollinizers suggested are Bing, Lambert and Royle Ann.

PRICES FOR STANDARD CHERRY

1" – 1¼" Br.	15.80
7/8" – 1" Br.	14.80
11/16" – 7/8" Br.	13.80
9/16" – 11/16" Br.	12.70

NUT TREES

PRUNUS DULCIS (Almond)

All in One: Mid-to-late-harvest season. Tree is small and bears heavy crop of soft shelled Non Pariel quality nut. Self fruitful. Use as pollinator for Non Pariel and Texas Mission.

Hall's Hardy: Late-harvest season. Tree is hardy and bears heavy. Nut is large and has a hard shell. Good for late frost areas.

Ne Plus: Early-harvest season. Tree flowers early and not a good choice for late frost regions. Nuts are large, long and narrow in a soft shell. Good pollinator would be Non Pariel.

* **Non Pariel:** Early-harvest season. Tree is large. Nut is large with soft, thin shell. Almond has sweet flavor. One of the best producing varieties.

Texas Mission Almond: Late-harvest season. Tree is large, upright and vigorous. Nut is small and round with a hard shell. Late blooming, safe for late frost area.

1" Br.	13.75
7/8" – 1" Br.	12.85
11/16" – 7/8" Br.	12.25
9/16" – 11/16" Br.	11.50

FILBERT (Hazelnut)

Barcelona: Excellent large, round nuts with moderate fill and a fairly thick shell. The tree is spreading and a good producer.

Eta: Pollenizer cultivar for late flowering filberts. High level of resistance to eastern filbert blight.

Felix: Late season. Used as a pollinator for most other varieties including Jefferson. High quality nut with easy blanching. Blight resistant.

Jefferson: Highly resistant to eastern filbert blight. Tree is somewhat smaller than Barcelona. Harvest time is same as Barcelona. Yield is higher than most filberts.

Lewis: Tree size is 75% of Barcelona. Harvest is earlier than Barcelona. Nut is small. Tree yield is good. Nut has good flavor and texture. Resistant to blight.

5' – 6' Br.	12.40
4' – 5' Br.	10.70
3' – 4' Br.	9.35

WALNUT

Manregion and Carpathian Walnut: Hardest varieties. Fast growing tree that will survive very cold weather. Nuts are large with a soft shell that cracks easily. Delicious flavor. Requires pollinizer.

6' Whip.	13.25
5' Whip.	12.05
4' Whip.	10.45
3' Whip.	8.75
2' Whip.	7.60

Franquette Walnut: Tree is late blooming. Nut is high in quality, oblong in shape and pointed, with a mild taste. Partially self-fruitful.

6' Whip.	18.80
5' Whip.	17.00
4' Whip.	14.70

No Filbert sale to Washington

DECIDUOUS SHRUBS

CHAENOMELES (Flowering Quince)

Cameo Flowering Quince: Grows in height from 4'-5' with an equal spread. Shape is round. Foliage is glossy green. Flowers are bright peachy pink. Fruit is green. Zone 5.

Jet Trail Flowering Quince: A dwarf quince only growing to about 3' with a spread of 3'-4'. Foliage is glossy green. Flowers are white and very profuse. Nearly thornless. Zone 5.

Texas Scarlet Flowering Quince: Shrub is low growing, 2'-3' and spreading. Flowers are tomato red.

CORNUS (Dogwood)

Cardinal Red Osier Dogwood: Grows in height from 8'-10'. A stoloniferous form more vigorous than others. Fruit and flowers similar to Bailey. Bright orange-red twigs in winter. Zone 3.

European Variegated Dogwood: Grows in height from 6'-10' with a spread of 5'-8'. Shape is rounded. Foliage is green with creamy white margins. Bright red branches look beautiful during the winter. Zone 3.

Red Twig Dogwood Bailey: Grows to 6'-8' in height. Exceptionally bright red twigs in winter. Porcelain blue fruit.

Red Twig Dogwood Siberica: Grows to about 7', with a 5' spread. Gleaming coral red branches in winter.

Winter Flame: Grows in height from 8'-10' with a 10'-12' spread. Deer resistant. Colorful stems with yellow, orange and red. Blooms in the spring with white flowers. Zone 4-8.

Yellow Twig Dogwood: "Lutea" form and growth habits like Red Twig but branches are bright yellow with green foliage. Zone 3.

FORSYTHIA

Beatrix Ferrand Forsythia: The forsythia grows upright to a height of 7'-9' with a spread of 4'-6'. Branches are thickly covered with large clusters of yellow flowers marked with orange. Zone 4.

Karl Sax Forsythia: Resembles Beatrix Ferrand but is lower growing. Zone 4.

Prices for the above items on page 25

FORSYTHIA — Continued

Lynnwood Gold Forsythia: Grows more upright. Has profuse golden yellow blooms which are large in size. Zone 4.

Spring Glory Forsythia: Grows in form as above Forsythia but flowers are pale yellow in color, clustered mostly at base of branch. Zone 4.

HIBISCUS Syriacus (Althea)

Arden: Double Purple

Blushing Bride: Double, Rosy Pink

Collie Mullens: Double Red Purple

Diana: White

Minerva: Single Lavendar Pink

Red Heart: Large White, Red Eye

Woodbridge: Single, Orchid Pink, Scarlet Red Eye & Large, Creamy Stamen

PHILADELPHUS (Mock Orange)

Glacier Mock Orange: Fountain-like fragrant double white flowers. Flowering late spring into early summer. Zone 4.

Minnesota Snowflake Mock Orange: A hybrid; flowers tend to be double and very fragrant. Grows in height from 6'-8'. Zone 4.

SALIX

Dwarf Blue Arctic Willow: Grows in height to 4' with equal spread. Dense, rounded form. Leaves are blue-green. Zone 4.

Dappled Willow: Grows in height from 6'-8'. The new growth is a glossy bright pink which becomes variegated slender leaves dappled with colors of pink, white and green. Zone 3.

SPIREA

Anthony Waterer Spirea: Grows in height from 2'-3'. A very compact shrub. Attractive rose pink flowers clusters in spring and continue throughout the summer. New growth deep reddish purple. Zone 4.

Gold Flame Spirea: Grows in height and spread from 2'-3'. Bright green foliage, turning copper orange in fall. Clusters of pink flowers all summer. Zone 4.

Prices for the above items on page 25

SPIREA – Continued

Little Princess Spirea: Grows in height from 2'-3'. Small dense mounded shrub. Larger leaves with crimson and white flowers in the spring. Zone 4.

Snowmound Spirea: Shrub is compact with dense foliage. Flowers bloom in June, they are white and grow in round clusters. Zone 4.

Thunbergii Spirea: Grows in height to 5' with arching branches. Color turns to a soft reddish brown in fall. Flowers are white and grow in clusters. Very showy. Blooms in April. Zone 4.

Van Houtti Spirea: Grows in height from 6'-8' tall with arching weeping-like habit. Flowers are white and grow in clusters in April and May.

SYRINGA

Common Lilac: Grows to 15'. Strong shrub with lovely scent. Blooms early to mid-May. Vigorous hedge or screen.

WEIGELA

Bristol Ruby Weigela: Shrub grows from 5-6' tall with about equal spread. Flowers are deep red. Zone 5.

BETULA (Birch)

BETULA jacquemonti

Jacquemonti Birch: Tree grows upright with height reaching 40'-50'. Known as the whitest bark birch, it has dark green leaves with a leathery texture. Zone 5.

Prices for the above item on page 32

BETULA nigra'

Heritage® 'Cully' Birch: Grows in height to 40' with a spread of 30'. Shape is broadly pyramidal. Leaves are light green and glossy. Leaves change to yellow in the fall. Tree is resistant to bronze birch borer. Zone 4.

River Birch: Grows in height from 40'-50' with a 25'-30' spread. Bark is orange and peeling. Fall color is golden. Tree is resistant to birch borer and is tolerant of wet soil. Zone 4.

BETULA papyrifera

Paper Birch: Slower turning than European White Birch. This white-barked birch reaches 70'-80' in height. Grows very fast and lives a long life. Zone 2.

BETULA pendula (Young's)

Young's Weeping Birch: Growing at a moderate rate, this small birch grows from 18'-20' tall with a spread of 20'-25'. Head is dome-shape with foliage much like the White Birch. Zone 2.

BETULA pendula laciniata

Cutleaf Birch: This birch is very hardy, with graceful, weeping branches. Grows in height from 45'-50'. Bark is silvery white with deep-cut, glossy green leaves which turn yellow in fall. Zone 2.
